ALUK[®]

Benefits of Aluminium

For over 30 years, we've been at the forefront of aluminium window and door design.

But why aluminium?

As one of the most sustainable construction materials available, choosing aluminium reduces carbon emissions and contributes to the lifecycle costing of a building. Its strength, durability and recyclability, amongst many other benefits, make it an ideal material for buildings.

- Lightweight, strong and almost 100% recyclable
- Doesn't warp or rust and is near maintenance-free
- Doesn't age like other organic materials and needs no UV protection
- Resistant to changing temperatures with minimal expansion and contraction
- Exceptionally versatile and easy to install

At Aluk, we're experts at using this versatile metal to create high performance and sustainable aluminium systems that surpass the needs of fabricators and installers across the UK.

By experts for experts

It's fair to say we live and breathe aluminium at AluK. From its melting point of 660.32°C, its vital role in the aerospace industry, to its remarkable low density, there's little we don't know about atomic number 13. More importantly, we're experts at using this versatile metal to create high performance and sustainable window and door systems that surpass the needs of fabricators and installers across the UK.

From the production line to our design and sales offices, every member of the AluK team is a leader in their field. It's this collective expertise and our traditional family values that has enabled us to design, engineer and manufacture industry-leading facade systems since 1993.

Boasting slimmer sightlines and greater feature options, all our products are manufactured to the highest UK standards. So whether commercial or residential, modern or traditional, you can be confident our experts will ensure every AluK product delivers peerless performance and signature style.

Tried, tested and trusted

From trusted favourites to the latest innovations, our comprehensive range of aluminium window and door systems has been designed and developed with fabricators, installers and homeowners in mind at every stage.

Furthermore, every system delivers the aesthetic appeal and exceptional build quality demanded by the industry. It also goes without saying they've all been tested and certified to the latest standards and accreditations.

These include PAS 24, BS4873, Secured By Design and Qualicoat for starters. Not to mention ISO 9001. They also hold Q-Mark Certifications for general performance windows and enhanced security windows and doors. Should we go on?

Whichever system you choose, we'll work closely with you to ensure you have all the information you require for successful fabrication and installation.

All the latest structural, thermal and wind calculations are available, as is a comprehensive suite of CAD, NBS Specifications, performance and environmental data.

ALWAYS UP TO THE TEST

Why choose AluK?

Driven by design

Without compromising on strength, our aluminium window and door systems are designed to offer your customers the narrowest of sightlines, allowing bigger glazing and providing greater light into their home.

Our integrated systems are designed for maximising profiles and parts, as well as to ensure fast fabrication and a wide range of installation options.

Colour

Access a large spectrum of contemporary and classic colour choices and finishes.

We also offer a range of standard single and dual colour products from stock.

Security

We understand the importance of security to your customers. That's why all our window and door systems are independently tested to ensure they not only meet current security regulations for new builds, but that they're inherently burglar resistant too.

Most of our systems are certified by PAS 24, Secured by Design and Q-mark accredited.

Thermal efficiency

Our window and door systems offer award-winning U-value performance for both double and triple glazing.

In fact, we were the first company to ever gain an A-rated aluminium double glazed window system in the market.

AluK Academy

Our free to access, in-house training academy is available to support you every step of the way. Whether that's keeping you up to date on our products, or making sure you understand legislative changes in the industry.

To find out more simply email training.uk@aluk.com

Performance

Each system includes water and acoustic barriers, and utilises the latest manufacturing technologies and techniques to provide long-term peace of mind.

They also have integrated drainage paths that allow water to pass through the system. This, combined with the high quality air seals and barriers, ensures they can tackle the ever-changing British climate with ease.

Window Energy Ratings

Our aluminium window systems are rated for their energy efficiency using the familiar A-G scale.

This means homeowners and architects can instantly see which windows to choose. WERs also affect fabricators, because in order to supply WER products a fabricator must join an official and recognised scheme.

This is to ensure that manufacturers can prove they have audited processes in place and that the ratings displayed are accurate.

As you'd expect, we have our own group scheme at AluK. This provides members fast track access to all our WER data, saving them valuable time and effort.

Service excellence

Expert service is key at AluK, so our trained architectural technicians and engineers are always on hand to offer guidance and support from design through to installation. We also have highly experienced Project Consultants able to help with design, system selection, construction details and project specifications for your specific sector.

Design Studio

As well as creating market-leading facades, we also have a vested interest in the industry as a whole. Our in-house design studio was created as a space for collaboration, education and interaction. Playing host to a range of specialist events and CPD seminars, our door is always open.

Understanding Part L

According to industry research, energy efficiency is still the third highest priority for homeowners looking to invest in new windows and doors (after quality and security) and surely, they have to be able to trust every promise being made by suppliers on the performance of their products?

We believe so. That's why AluK is committed to driving up standards right across the industry – and compliance is a major part of that. We recognise that Part L is challenging, but it's certainly not insurmountable.

Who is responsible?

- **Systems House** – the systems house is responsible for any system related data. This is usually supplied using technical manuals or data sheets.
- **Fabricator** – the fabricator is responsible for supplying the correct finished product and associated data, inline with the current legislation. If the glass is not supplied, information relating to the required thermal performance of the glass unit must be available.
- **Installer** – the installer is responsible for the product in situ and the UKCA/CE marking. Using information supplied from all parties the installer must ensure that the correct specification of product is correctly installed.

How do AluK products comply?

As a systems house, we have no choice but to comply with the new lower U-Values. We support the aim to reduce our carbon footprint in the UK and want to play our part by ensuring our windows and doors meet the new limiting values.

How have we changed our products?

Our route to meet the new regulations and support our customers has meant engineering many improvements to the internal design without changing the appearance of our systems.

Using new thermal break designs and foams, and new gaskets, our well-loved products have been modified to comfortably meet the new regulations for new build and existing dwellings.

Rest assured that many of our standard (non-HI) products can achieve both the 'Limiting' and lower 'Notional' U-values given in the English and Welsh regulations using triple glazing, if that is your preferred route.

For more information on new Part L regulations, head over to our dedicated website.

Colours for every occasion

From contemporary to heritage, the AluK colour collection combines four high-quality colour ranges that offer style and durability.

Elements, Homestead, Spectrum and Urbane each offer a wide choice of durable coatings that are extremely resistant to scratching and corrosion.

With an inspired range of textured, non-textured, metallic and special effects finishes, these palettes reflect both the latest colour trends and the enduring classics within the market.

Elements

Our stylish matt colour range features 18 vibrant RAL options in a smooth finish. Inspired by the diversity of nature, Elements offers the perfect combination of rich colours and versatile shades that will compliment any style of property.

Homestead

Inspired by traditional and period design, our timeless Homestead range offers a classic palette of tranquil neutrals and deep, cool hues. Combining the charm of the past with a modern, durable finish, Homestead has 13 tasteful RAL options to discover, all in a long-wearing textured finish for windows and doors.

Spectrum

Spectrum combines striking tones with textured metallic and special effects finishes to create an opulent range that is both modern and highly durable. With 21 contemporary textured colours, Spectrum compliments both high-end residential projects and volume specifications.

Urbane

Inspired by the intensity of contrast, Urbane offers the distinctive combination of strong tones and smooth shades that match the look and feel of an anodised finish. With 14 bold metallic colours to choose from, Urbane offers a protective finish to windows and doors in high-end and commercial developments.

If you'd like a colour brochure please contact us on 01291 639739
or email us at info.uk@aluk.com

These images should only be used as a colour guide rather than a true representation of the actual product colour.

Window systems

For over two decades we've been designing unique aluminium window systems that exceed the performance standards expected in modern building design.

Functionality and flexibility

We offer a wide range of window frame options that cater for various applications such as interface depths or bay angles.

We also understand that the ability to combine frame options is a major benefit to both the cost and appearance.

Our frame options include deep head profiles for trickle vents, odd leg frames for accommodating hardware timber and heritage for overcoming stone mullion and cill details.

Equal leg frame options are available from 25mm, 35mm and 55mm options.

Frame extenders are also available for our 70mm systems and for improved U-values.

Glazing options

Every project is different, which is why our systems allow for both internal and external glazing options.

We also offer glazing add-ons to suit heritage style applications.

Aesthetics

We offer a wide range of internal and external aesthetic styles. Chamfered, Ovolo, Square or Putty line options can really make any project look modern or traditional.

Our double beaded options allow for internal glazing without the use of dummy vents.

Openings

AluK windows are available in a full range of opening options; from open in to open out, side hung, top hung, bottom hung and tilt before turn, to French casement, fixed light and multi-light.

Design features

- › From odd leg and equal leg to deep head and frame reversers
- › Internal and external glazing options
- › PAS 24 certified
- › Integrated systems for maximising profiles and parts
- › Three chamber profile for maximising strength while crimping – achieves perfect corner assembly every time

58BW ST Flush HI, Putty Line

58BW ST Flush HI

58BW Flush HI

58BW FLUSH HI Window

The 58BW Flush window combines minimal sightlines and maximum weather resistance with all the best features of the tried and trusted 58BW range: advanced performance, versatility and security.

With a choice of slim sashes and a range of configuration options, the flush finish and slim sightlines of the 58BW Flush make this the perfect choice for contemporary new-build and refurbishment projects.

A double rebate provides market-leading weather performance, even in more exposed locations, and the 58BW Flush utilises common hardware with the existing 58BW and Heritage ST window ranges to ensure it can withstand a range of weather conditions.

The 58BW Flush shares the same sashes, features and hardware with the 70mm frame option for the 58BW suite, making it quicker and easier to fabricate with just three new profiles.

DESIGN FEATURES

- › Advanced weather performance – features like the double rebate, and friction stays on side-hung windows offer protection against bad weather conditions
- › Slimmer sightlines – 45mm ultra-slim sash suits a range of property styles
- › Unique polyamide thermal break design to improve thermal performance
- › Certified under the Secured by Design scheme
- › Tested to PAS 24

OPTIONS

- › Open-out sashes including top and side-hung.
- › The flush shadow line can be complimented with a choice of flat, putty line or stepped edge Heritage vent styles to suit the property
- › Available in a range of standard and RAL colours.
- › Stock offer – readily available on a 5-day lead time in colours 9910HG, 7016M, and 9005M as well as dual colour white/grey and white/black.

Contemporary Design with a traditional twist

Our 58BW Flush windows are the ideal replacement for timber windows in traditional refurbishment projects. Replicating the slim sightlines and sharp shadow lines of timber, they offer all the inherent benefits of aluminium, such as low maintenance, and enhanced security, thermal and weather performance.

For the owners of a picturesque brick and flint cottage in rural Hampshire, they proved the perfect choice to replace draughty and inefficient timber frames in their 19th century home.

The owners wanted to replace their existing windows with something which maintained the essential character of the property, but which had a nod to contemporary 21st century design. They chose AluK's 58BW frames, with an ultra slim 45mm sightline on the sash and 24mm on the frame, primarily because of the aesthetics, but also because they are virtually maintenance free.

In total, 13 open out casement windows have been installed in the cottage, all in RAL7004 Signal Grey with a 5mm shadow line and no visible gasket. Double glazed throughout, they are not only eliminating draughts, but also helping to reduce energy bills.

The windows were manufactured by AluK's fabrication partner CWG Choices and installed by Allums Property Services of Newbury. Fabrication is straightforward because the 58BW Flush uses the same standard sash profiles as the AluK 58BW ST window and, installation is made easy thanks to the 70mm depth and internal glazing.

Kevin Allum of Allums Property Services commented: "This was the first time we had installed the 58BW Flush frames and it was a real pleasure. The installation looks great and the homeowners were delighted with the whole process from start to finish."

58BW CASEMENT HI Window

Built to the highest UK standards, the 58BW Window System delivers a high performance and cost-effective solution with impressively narrow profiles. Equally at home on residential and commercial projects, the system is available in a number of formats including Top Hung, Side Hung and French Casement.

The system's clean lines and advanced functionality meet the demands of almost every modern building construction. Its competitive pricing also makes it a highly popular choice with specifiers both in the UK and around the globe. In addition to being certified under Secured By Design and tested to PAS 24, the 58BW also holds a Green Guide 'A' rating.

DESIGN FEATURES

- › Certified under the Secured By Design scheme
- › Tested to PAS 24
- › Integrated deep head profiles for ease of trickle ventilation
- › Unique polyamide thermal break design to improve thermal performance
- › Casement system sightlines to match the Tilt-Before-Turn window sightlines
- › Reverse rebate option for internal glazing throughout

OPTIONS

- › Available in two frame depths: 58mm or 70mm
- › Supports both open-in and open-out projects
- › Internally or externally glazed to accommodate low and high-rise projects
- › Glazing 24mm–40mm
- › Available in the following configurations: Top Hung, Side Hung, Bottom Hung, Fixed Light, Multi-light and French Casement
- › Available for Lifetime Homes (LFT)
- › Dedicated fixing straps for ease of installation
- › Designed with a Euro Groove to accommodate standard locking hardware
- › Smoke vent certification compliance to EN12101-2:2003 Annex G
- › Available in single or dual colour polyester powder coating, texture and anodised finishes

58BW ST HI Steel Replacement System

Ideal for projects where planning or design requires the installation of sympathetic materials, our 58BW ST HI Steel Replacement Window System provides the look of steel with the benefits of aluminium. Designed to replace and complement existing steel windows, the range has been specifically developed for use on listed buildings, warehouses and similar buildings, where steel windows have always traditionally been fitted.

Available in a wide range of styles including Top Hung, Side Hung, Fixed Light and French Casement, the system cleverly replicates the narrow sight lines associated with steel windows whilst providing superior performance and security. The system also includes hardware that is sympathetic to traditional steel window designs.

DESIGN FEATURES

- › Slim sightlines to match existing steel windows
- › Internally and externally beaded for ease of site glazing on high-rise applications
- › Unique polyamide thermal break design to improve performance
- › Integrated deep head profiles for ease of trickle ventilation
- › Accommodates standard hardware including friction stays and shoot bolt locking
- › Certified under the Secured By Design scheme
- › Ideal for Heritage, Listed Buildings and steel window replacements

OPTIONS

- › Accommodates up to 32mm glazing units for thermal and acoustic performance
- › Casement clips available for easy fit and removal of dummy vents
- › Dedicated fixing straps for ease of installation
- › Four different sash profiles to achieve design and planning permission requirements
- › Available in single or dual colour polyester powder coating, texture and anodised finishes

Window

OPEN-OUT DETAILS

OPEN-IN DETAILS

Beautifully engineered and brilliantly functional, the C70S delivers class-leading performance with U-values of 1.3 W/m²K, advanced water tightness and a range of features to simplify fabrication and installation.

Meeting and exceeding the key thermal, acoustic and performance demands of the commercial specifiers, the C70S is the perfect aluminium solution for residential and commercial projects.

DESIGN FEATURES

- › Universal EPDM carrier groove – allows clip-in EPDM strip and direct lug fixing to be used on all outer frames, frame extenders and sub cill profiles
- › Outer Frames, Transoms/Mullions, Beads, Gaskets, Ancillary profile parts used across both Open-in and Open-out
- › Consistent sightlines with 58BW system offering maximum project flexibility
- › Euro groove (16mm full depth) allowing for a wider choice of hardware
- › 5-day lead time in 9910HG, 7016M, 9005M and key dual colour options

OPTIONS

- › Three levels of insulation: standard, partial and HI
- › Glazing options 24mm-50mm
- › Side Hung, Top Hung, Fixed Light & Tilt Before Turn configurations available
- › Trickle ventilation available

Door systems

Engineered to integrate seamlessly with our window system range, our aluminium door systems remain our most popular products and provide unrivalled safety, security and installation simplicity.

Heritage Entrance Door

Stylish and industrial, the Heritage Entrance Door allows you to create a seamless aesthetic across a wide range of door opening sizes and uses, from single doors to French doors with multiple fan lights.

Slim sightlines of just 51.7mm allows maximum light transmission, elegantly framing outside space. All complemented by market-leading U-Values of 1.4 w/m²K making it fully compliant with Part L Building Regulations for refurbishment projects.

Crafted to match the 58BW HI window range, its shared profiles, beads, and ancillaries offer new and existing fabricators a full heritage range of windows and doors with less stock-holding and simple fabrication.

DESIGN FEATURES

- › Suited to existing 58BW ST HI range of profiles, beads and ancillaries
- › 45 degree mitre and crimped sash
- › Slim sightlines: 51.7mm sash / 112.5mm sash to mullion
- › New Heritage door 28mm QUIK CLIP™ bead for door sash
- › Open Out/In 90 degree door restrictor

OPTIONS

- › Suited Heritage door hardware and handles in four colours/textures
- › Option to add multiple horizontal and vertical profiles to door sash using plant-on bars or 46.5mm door transom profile
- › Configurations of single / double / open-in / open-out with options for side and fan lights

58BD HI

Entrance Door

Available in a wide range of styles and formats, our stylish aluminium entrance door system is suitable for both light and medium-duty use.

Designed with security and flexibility front of mind, every door in the range is available in single and double configurations making them ideal for almost any application.

DESIGN FEATURES

- › Certified under the Secured By Design scheme
- › Tested to PAS 24
- › Multi-point locking mechanism
- › Cloaking feature on slave door conceals lock and prevents any access to locking points
- › Eurogroove hardware fitting
- › Security feature includes anti-lift feature built into the hinge

OPTIONS

- › Glazing 24mm – 40mm
- › 58mm or 70mm frame depth to accommodate varying types of applications
- › Low threshold option
- › Available in a range of single or dual colour and anodised finishes
- › Available for new build or refurbishment projects
- › Available in single or double door configuration

77ID Fully Rebated Door System

Our highest-performance door, the 77ID fully rebated door system is ideal for new build and refurbishment developments. This system integrates minimal sightlines into our 77 window systems and is suitable for use in both high and low-rise buildings. The system has been specifically designed to meet the most demanding UK performance requirements in terms of thermals, weathering and security.

Modern contemporary styling and a wide variety of configurations delivering 2025 future ready thermal performance through the latest industry technologies of high-performance polyamides, insulated centre seals, profile foam insertions and class leading weather performance via multiple seals including central gasket which also improves acoustic performance. The 77ID system also fully integrates into our curtain wall and 77 window systems.

For optimal design flexibility, the 77ID is available in single or dual colour options, including any RAL colour and anodised finishes.

DESIGN FEATURES

- › Highest levels of thermal performance
- › Multi chamber low lambda polyamide thermal breaks insulated composite centre seals and profile foam inserts
- › Integrates with AluK curtain wall and 77 series window systems
- › Dedicated groove for factory mounting of membranes ensuring air, wind and water performance
- › 77mm minimal frame depth
- › High performance low threshold solution
- › Fully rebated flush sash profile design for uninterrupted sleek finish

OPTIONS

- › Wide variety of configurations
- › Three hinge methods to choose from face mounted, slim barrel and fully concealed
- › Modular locking arrangement both handle or key driven locks
- › Incorporates the AluK Novaue handle design range for suited windows and doors
- › Customisable in almost every possible single or dual colour polyester powder coating, textured or anodised finish available
- › Enhanced PAS24 security tested solutions

CONFIGURATIONS

These elevations are PAS24 compliant.

GT55 TB

Commercial Door

An effective choice for shop fronts, entrances and ground floor treatments, the GT55 TB provides exceptional security and performance. Delivering high levels of energy efficiency thanks to its thermally broken profiles, the system has been designed in a ladder frame construction to provide a flexible solution for low-rise glazing applications. Screening can accommodate single and double glazing. Doors can accommodate double and triple glazing.

The system offers PAS 24 rating and is Secured By Design-accredited across a suite of configurations including single and double doors, screening, and side and fan lights. It also features a range of PAS 24 hardware including panic, mechanical and electro-mechanical locking for both single and double doors. Easily integrated with other AluK systems, the GT55 TB includes an integrated range of high traffic, anti-finger trap doors.

DESIGN FEATURES

- › 110mm frame depth to accommodate varying types of applications
- › Slim 55mm profile width for increased glazing and light transmission
- › Fully compatible with other AluK systems
- › One of the most comprehensive PAS 24 and Secured By Design certified system on the market today
- › Robust mechanical connection detail between rail and stile for ultimate strength in high traffic environments
- › GT55 TB can be used to create louvred and panelled doors with a variation of inserts

OPTIONS

- › Wide range of hardware available offering full customisation
- › Available in single or dual colour polyester powder coating, texture and anodised finishes
- › Different threshold, document M compliant
- › Concealed closer hardware

GT55 NI

Commercial Door

One of the most secure swing doors available on the market today, the GT55 NI has been specifically designed for high traffic environments where no insulation is required. This makes it a very robust and highly cost-effective choice when specifying applications such as shopping complexes and retail centres that require significant partitioning without the need for thermal insulation.

The GT55 NI is available in single colour options, with a choice of polyester powder coating and anodised finishes. A full range of security and customisable hardware is also available to suit the specific demands of your design.

DESIGN FEATURES

- › 110mm frame depth to accommodate varying types of applications
- › Slim 55mm frame profile for increased glass appearance
- › Ladder frame construction to enable easy on-site installation
- › Fully compatible with other AluK systems

OPTIONS

- › Can accommodate 6mm–28mm sealed units
- › Wide range of hardware available offering full customisation
- › Available in single colour polyester powder coating, texture and anodised finishes
- › Internal and external screen application available
- › Different threshold, document M compliant

S140

Lift and Slide Door

Modern, versatile and customisable, the S140 Lift and Slide Door combines high performance with contemporary design to provide a reliable aluminium door system for almost any project. Manufactured to the highest UK standards, this multi-configuration system can achieve Thermal U-Values of 0.8W/m²K (Triple glazed) and 1.2W/m²K (Double glazed).

In addition to double and triple track options, a comprehensive range of colours and anodised finishes are available for the system.

DESIGN FEATURES

- › Doc L compliant U-values for refurbishment and new build properties
- › Slimline outer frame with flush frame-sash sight line
- › 2-part triple track profile for ease of fabrication and installation
- › Accepts 24mm – 48mm glazing
- › Max 420kg panel weight

OPTIONS

- › Multiple sliding configurations
- › Double and Triple Track options
- › Available in single, dual colour and anodised finishes
- › Range of hardware and security features
- › **QuiK Clip**
- › Dedicated Cill

TRIPLE TRACK

KEY

* Performance data based on extended CEN size for Building Regulations. For full test performance details please contact Technical Services. Aluk recommends checking all system performance for any scheme prior to use. The maximum height of 3136mm, DOES NOT consider wind loading or glass weights which would need to be checked on each door setup of this size. i.e., if the glass weight is greater than 420 Kg's or the wind load above the interlock inertia values required, the height of the door would need to be reduced to accommodate these limits.

S67

Inline Sliding Door

Introducing the S67 Inline sliding door, a modern, versatile solution that seamlessly blends high performance with contemporary design. Engineered to meet the highest UK standards, this aluminium sliding door system offers reliability and flexibility for a wide range of renovation projects and new build. The S67 achieves 1.4 W/m²K U-value with double glazing.

Compatible with a multi-point lock and equipped with a low threshold, the S67 sliding door ensures security and comfort of use on all occasions.

DESIGN FEATURES

- › Mitre cut frame
- › Standard and reinforced interlock available
- › Glazing Gaskets available in Black
- › Low Threshold 22mm
- › Maximum weight per leaf of 200kg

OPTIONS

BSC94 HI

Inline Sliding Door

Modern, versatile and customisable, the BSC94 HI Inline Sliding Door combines high performance with contemporary design to provide a reliable aluminium door system for almost any architectural project. Manufactured to the highest UK standards, this multi-configuration system can achieve DSER of 'C' rating (double glazed) and sightlines of as little as 45mm.

In addition to dual colour options, a comprehensive range of colours and anodised finishes are available for the system. The BSC94 HI also features an anti bimetal low lambda strip to allow for varying expansion rates, ensuring the continued integrity of your design.

DESIGN FEATURES

- › Accepts 20mm – 31mm double glazing
- › Max 400kg panel weight
- › Certified under the Secured By Design scheme
- › Tested to PAS 24
- › Anti bimetal low lambda strip to allow for varying expansion rates

OPTIONS

- › Slimmer sightline of 45mm available
- › Multiple sliding configurations
- › Double track options
- › Available in single and dual colour
Anodised finishes also available
- › Range of hardware and security features

Lift & Slide Door

For those looking for effortless operation, look no further than our premium lift and slide door. Its vital statistics are impossible to ignore. Thermal U-Values of 1.5W/m²K (triple glazed). Panel weights of up to 400Kg. Sightlines as little as 45mm.

The list goes on. As do the benefits, including multiple configurations and a wide choice of colour finishes.

DESIGN FEATURES

- › Accepts 20mm – 31mm double glazing
- › Max 400kg panel weight (double bogey)

OPTIONS

- › Available in an Inline Sliding Option
- › Slimmer sightline of 45mm available
- › Multiple sliding configurations
- › Mono or Dual rail options
- › Available in single and dual colour
Anodised finishes also available
- › Range of hardware
- › Night vent position for air flow

F82 PLUS

Bifold Door

The F82 Plus Bifold Door System puts high performance and security front of mind, offering a wide range of configurations to support the bespoke requirements of your project. Multiple doors can be combined with open-in or open-out options in a variety of styles to create a wide expanse of opening.

The system is fully PAS 24 and Secured By Design-accredited, making it Document Q compliant. The full frame and cill have been designed to create a slimmer, symmetrical frame of 97mm combined with a reduced interlock sightline of 122mm, providing larger glazing areas without compromising performance. Thermal U-Values of 1.2 W/m²K (double glazed) and 0.9 W/m²K (triple glazed) assist with meeting the latest energy efficiency requirements.

Other key design features include a flush pop-out handle and contemporary traffic door handles. A new floating corner offers a true inside-out design, while the 110mm mid rail allows the creation of transoms in the door or solid panels in single and double doors for a uniform aesthetic.

DESIGN FEATURES

- › Unique pop-up handle, cycle tested to 25,000 operations for up to 80 years of reliable use
- › Integrated cill profile clips onto the outer frame sides, reducing sightlines
- › Heavy-duty stainless steel compact rollers as standard
- › Full symmetrical frame sightline of 97mm
- › 122mm slimline interlock
- › Larger glazing area

OPTIONS

- › Square bead
- › Glazing sizing range of 28mm–44mm
- › Available in a range of opening configurations, including a floating corner
- › Available in single or dual colour polyester powder coating, texture and anodised finishes
- › All configurations available open-in and open-out
- › 110mm midrail – make single or double doors using transoms or solid panels
- › New sub cill range – position onto varying widths of construction using the 225mm, 150mm or 95mm options

OTHER OPTIONS AVAILABLE

*The maximum height and panel width for the F82 Folding Sliding Door System are co-dependent and also dictated by the design wind load where the doors are being installed. Based on the site design wind load that the doors are subjected to this will influence the maximum height and width [per panel] to which the doors can be manufactured.

BSF70 HI Bifold Door System

The BSF70 HI Folding Door System gives maximum control over the style and operation of the doors. Multiple panels can be added to accommodate the unique design specifications of the building, with the option to open-in or out as required. The system's narrow profile ensures that maximum glazing is achieved, flooding spaces with natural light.

In addition to the inherent strength of aluminium, the BSF70 HI combines security hinges and locking mechanisms with a unique heavy-duty roller design to provide the security and reliability demanded in high traffic applications. The system also incorporates a pop out T-handle design that allows for square flush stacking panels when doors are fully open.

DESIGN FEATURES

- › Internally beaded with a softline or square detail to all external doors and panels
- › Four stainless steel wheels ensures smooth and consistent operation
- › Unique, flush line pop out T-handle that allows maximum door opening and square stacking of panels
- › Tested to PAS 24 and certified under the Secured By Design scheme

OPTIONS

- › Heavy-duty roller options
- › Integrated Cill
- › Chamfered and square bead options
- › Low threshold option that can be configured to achieve DDA and Part M compliance
- › Doors and panels can be used in a variety of configurations, style and design
- › All configurations are available in both open-in and open-out options
- › Full range of bespoke hardware available
- › Lift & Turn handle or pop out T-handle available
- › Glazing sizing range of 24mm–40mm
- › Available in single or dual colour polyester powder coating, texture and anodised finishes
- › **QUICK CLIP™** bead available with 28mm glazing
